

RADIANT HEATING  
AND COOLING SYSTEMS

# Uponor Radiant Heating and Snow Melt Quick Estimate Form

QUICK ESTIMATE FORM

The Radiant Heating and Snow Melt Quick Estimate Form provides preliminary quotes only. Detailed quotes and designs require a thorough building analysis including heat loss.

This form does not include design criteria for determining water temperatures, sizing the heat source, circulators, zoning or other heating components. The form is based on square footage and installation method and is not a substitute for a complete materials list.

**Note:** In residential applications only, each floor component is considered a separate water temperature as it relates to the reset control selection.

Uponor Design Services requires the following information to provide a quick estimate for heating and snow melt. For a complete design and materials list and additional design forms, contact Uponor Design Services at 888.594.7726 or [design.services@uponor.com](mailto:design.services@uponor.com).

**Project**

Name: \_\_\_\_\_  
 Address: \_\_\_\_\_  
 City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

**Company**

Contact name: \_\_\_\_\_  
 Company: \_\_\_\_\_  
 Address: \_\_\_\_\_  
 City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_  
 Phone: \_\_\_\_\_  
 Fax: \_\_\_\_\_

- Application**
- Radiant residential (not to exceed 3,000 sq. ft.)
  - Radiant commercial (not to exceed 10,000 sq. ft.)
  - Floor warming (not to exceed 3,000 sq. ft.)
  - Snow melt (not to exceed 10,000 sq. ft.)
  - Permafrost prevention (not to exceed 20,000 sq. ft.)

- Controls**
- Climate Cöntrol™ Multifunction Controller (outdoor reset control)
  - Climate Cöntrol Zoning System (wireless zoning)
  - Thermostats, actuators and relays

- Basement**
- Square feet of radiant area \_\_\_\_\_
  - Number of zones \_\_\_\_\_
  - Embedded tubing
  - Quik Trak® radiant panels
  - Fast Trak™ 1.3 knobbed mats
  - Fast Trak 0.5 knobbed mats

- Main Floor**
- Square feet of radiant area \_\_\_\_\_
  - Number of zones \_\_\_\_\_
  - Embedded tubing
  - Concrete overpour
  - Quik Trak radiant panels
  - (Note: Quik Trak over a concrete slab requires a minimum 5/8" plywood underlayment)
  - Fast Trak 1.3 knobbed mats
  - Fast Trak 0.5 knobbed mats
  - Joist heating:
    - Joist Trak™
    - PEX clips
  - Radiant wall
