Radiant Ready 30E™

A complete radiant
mechanical room package

A Complete Radiant Mechanical Room Package

If you're looking for the fastest method to install radiant floor heating in a basement or any room in a home, Uponor has the answer.

With Radiant Ready 30E™, all the components are already installed in a preassembled unit: boiler, manifold, pump, expansion tank, pressure-relief valve, isolation valves, thermostat and air vent. Simply connect the tubing, thermostat and electrical power and you're done!

- 240V/50 Amps
- Electric boiler
- Up to 12 loops
- 30,000 BTU/h
- Hard-wired

Radiant Heating

Up to 2,000 sq. ft.*
