

A roll of white plastic tubing with a purple stripe. The tubing is curved and has the text "UPONOR AquaPEX Reclaimed" printed on it. The background is a soft, out-of-focus purple and white.

Uponor

Uponor AquaPEX® Reclaimed Water Tubing

All the benefits of Uponor AquaPEX® with a layer of purple coloring for reclaimed water systems

In a reclaimed water (graywater) system, water is captured from sinks and showers into a holding tank where it goes through a filtering process. Then, specially designated purple tubing — the industry standard color for reclaimed water systems — distributes the filtered, reclaimed water from the holding tank out to laundry, toilets and irrigation systems.

Uponor AquaPEX Reclaimed Water Tubing

- All the great features of Uponor AquaPEX: flexible, durable, corrosion-resistant, over 20-year proven history in plumbing, 25-year limited warranty
- Uses Uponor's proven ProPEX® fitting technology for fast, easy, reliable connections without the need for torches, glues, solvents or gauges
- Listed to NSF-rw and AWWA C904
- Helps earn LEED® or National Green Building Standard™ points
- Available in ½", ¾" and 1" 300-foot coils and 1", 1¼", 1½" and 2" 10-foot and 20-foot straight lengths
