## Uponor Heat-only Thermostat with Touchscreen

A radiant-specific  
thermostat for  
the ultimate  
energy-efficient  
control

# Uponor Heat-only Thermostat with Touchscreen

The Uponor Heat-only Thermostat with Touchscreen (A3100101) is designed for precise temperature control of hydronic radiant heating applications. It uses fully automatic differential and pulse width modulation (PWM) control functions to ensure each radiant zone is comfortable and energy efficient.

The thermostat can operate a radiant heating system based on the air sensor measuring operative temperature, a floor sensor, or a combination of both to provide the optimal level of comfort and control.

It also allows the use of a floor sensor (A9010599) to measure floor temperature for enhanced comfort and to protect the surface from overheating.

## Key features

- Capacitive touchscreen
- Color-enhanced display
- Slim, aesthetic design
- Operative temperature sensing
- Two-wire power sharing (easier installation)
