INSTRUCTION SHEET

ARCAT® SpecWizard® Instruction Sheet

ARCAT® SpecWizard® is a valuable tool for specification writers. It automatically creates a complete CSI three-part formatted construction product specification that can be downloaded to Microsoft Word and other word-processing formats.

Refer to the instructions below to create an Uponor product specification.

Step 1

Go to the ARCAT homepage at www.arcat.com and enter "Uponor" in the search box (see **Figure 1**).

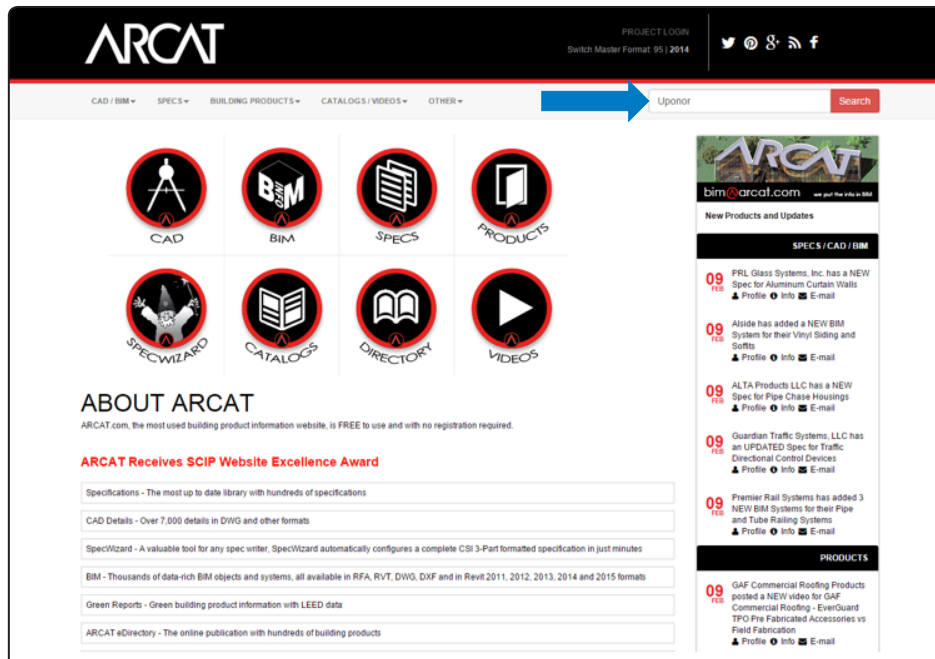

Figure 1: Enter Uponor in Search Box of ARCAT Homepage

Step 2

Click on “Uponor” to go to the Uponor product page (see **Figure 2**).

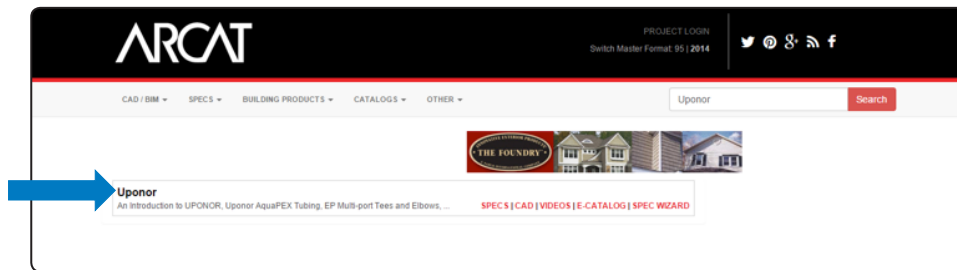

Figure 2: Click on Uponor

Step 3

On the Uponor product page, select the “SpecWizard” icon on the left (see **Figure 3**).

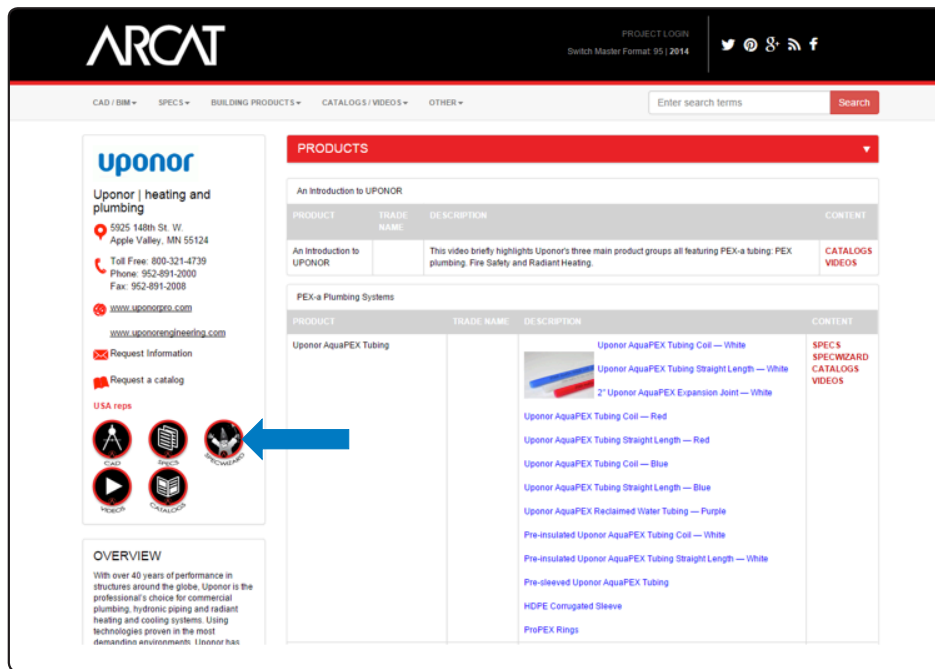

Figure 3: Select the SpecWizard Icon on the Uponor Product Page

Step 4

Click on “Launch SpecWizard” (see **Figure 4**).

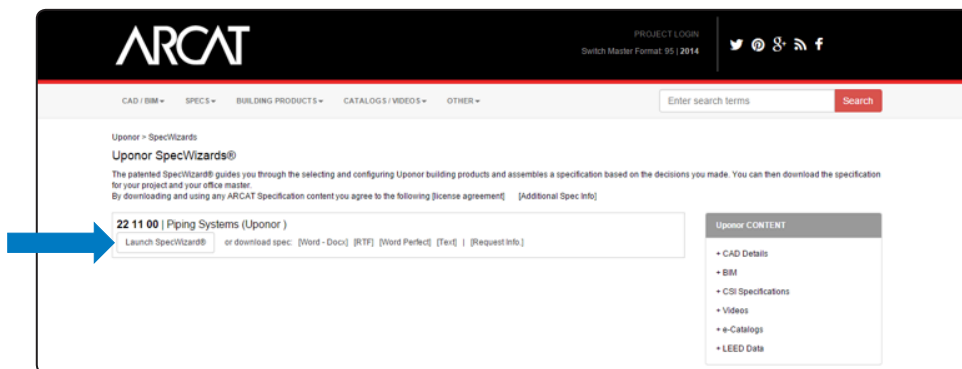

Figure 4: Click on Launch SpecWizard

Step 5

On the SpecWizard page, there are three options for creating a specification: Radiant Heating and Cooling System, Hydronic Piping and Fittings, and Domestic Water Piping (see **Figure 5**).

Note: If you would like to generate all three specifications, please do so independently (i.e., one specification for domestic water piping, one for hydronic piping and one for radiant heating and cooling).

Important! In the upper right-hand corner, make sure 'masterformat 2014' is selected before creating the specification.

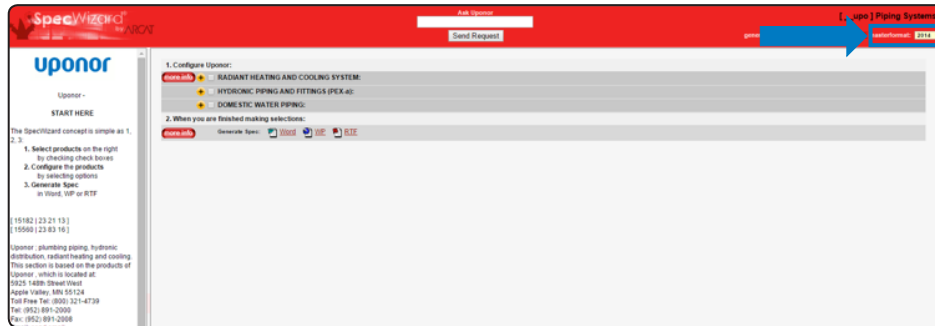

Figure 5: Select the Specification to Create (make sure 'Masterformat 2014' is selected in the upper right)

Step 6

After selecting one of the check boxes, an option dropdown list will generate, allowing the specifier to tailor the specification to his/her specific needs (see **Figure 6**).

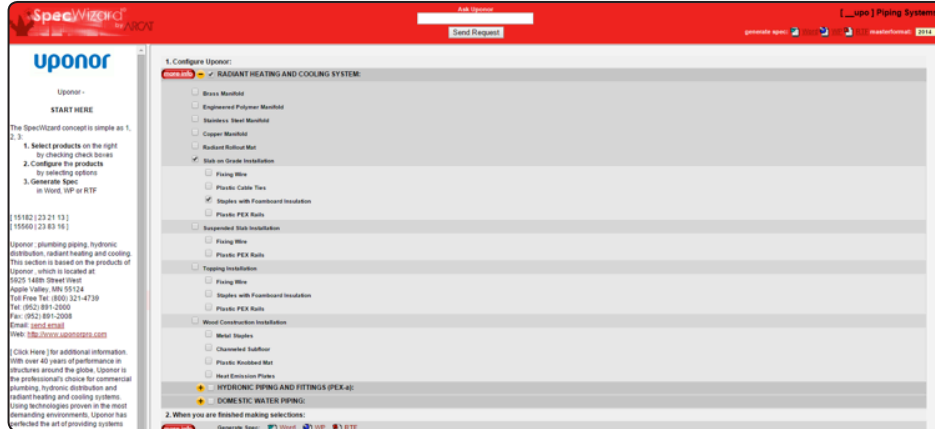

Figure 6: Tailor Your Spec by Selecting Checkboxes in the Dropdown List

Step 7

Once all the selections are chosen, the user can generate the specification into numerous formats, including Microsoft Word (see **Figure 7**).
