Uponor AquaPEX® Reclaimed Water Tubing

To help building professionals meet the growing demand for sustainable systems, Uponor is expanding its offering of Uponor AquaPEX® Reclaimed Water Tubing for reclaimed water (graywater) systems. Now, the purple pipe (industry-designated color for reclaimed water systems) is available in sizes up to 2".

Product Offering

Part No.	Part Description
F1060502	½" Uponor AquaPEX Purple Reclaimed Water, 300-ft. coil
F1060752	¾" Uponor AquaPEX Purple Reclaimed Water, 300-ft. coil
F1061002	1" Uponor AquaPEX Purple Reclaimed Water, 300-ft. coil
F1961002	1" Uponor AquaPEX Purple Reclaimed Water, 10-ft. straight length, 100 ft. (10 per bundle)
F1921002	1" Uponor AquaPEX Purple Reclaimed Water, 20-ft. straight length, 200 ft. (10 per bundle)
F1911256	1¼" Uponor AquaPEX Purple Reclaimed Water, 10-ft. straight length, 50 ft. (5 per bundle)
F1961256	1¼" Uponor AquaPEX Purple Reclaimed Water, 20-ft. straight length, 100 ft. (5 per bundle)
F1911506	1½" Uponor AquaPEX Purple Reclaimed Water, 10-ft. straight length, 50 ft. (5 per bundle)
F1961502	1½" Uponor AquaPEX Purple Reclaimed Water, 20-ft. straight length, 100 ft. (5 per bundle)
F1912006	2" Uponor AquaPEX Purple Reclaimed Water, 10-ft. straight length, 50 ft. (5 per bundle)
F1962002	2" Uponor AquaPEX Purple Reclaimed Water, 20-ft. straight length, 100 ft. (5 per bundle)

Frequently Asked Questions

How do reclaimed water systems work?

In a reclaimed water system, water is captured from sinks and showers (also called greywater) into a holding tank where it goes through a filtering process. Then, specially designated purple tubing — the industry standard color for reclaimed water systems — distributes the filtered, reclaimed water from the holding tank out to laundry, toilets and irrigation systems.

What standards does Uponor AquaPEX Reclaimed Water Tubing meet?

Uponor AquaPEX Reclaimed Water Tubing is listed to cNSFus-rw and AWWA C904. For the complete listing of all codes, standards, ratings and listings, see the submittal available on uponorpro.com in Technical Support/Specs & Submittals.

Why use Uponor AquaPEX Reclaimed Water Tubing as opposed to alternative offerings?

Uponor AquaPEX Reclaimed Water Tubing offers all the benefits of Uponor AquaPEX crosslinked polyethylene (PEX) tubing that

plumbing professionals have come to rely on — flexible, durable, corrosion-resistant, more than 20-year proven history in plumbing, 25-year limited warranty and one fitting tool without the need for torches, solder, gauges, glues or solvents. Additionally, plumbing professionals don't have to switch products when installing potable plumbing and reclaimed water systems. They can seamlessly move from Uponor AquaPEX for the potable system to Uponor AquaPEX Reclaimed Water for the reclaimed water system, without having to switch tubing, tools or fittings.

What is the cost to add a reclaimed water distribution system?

The cost can vary by region and structure size. However, adding a dual potable/reclaimed water plumbing system to a home or building can add minimal and sometimes even less cost compared to traditional plumbing systems.

Does a reclaimed water distribution system need a separate storage tank?

It depends on the application. While all reclaimed water systems require a filter tank to capture and sanitize the reclaimed water from sinks and showers, the requirement for a separate storage tank depends on the specific plumbing application, (e.g., structure size, number of bathrooms, total water usage, etc.).

Can using Uponor AquaPEX Reclaimed Water Tubing help earn LEED® or National Green Building Standard™ points?

Depending on the application, using Uponor AquaPEX Reclaimed Water Tubing in a reclaimed water system can help a home or building earn LEED® or National Green Building Standard™ points. (For further information, refer to usgbc.org or nahb.org.)
